

Stackwork

Digital Solutions

Websites, e-commerce, booking systems, and business tools — built to work beautifully.

We design and build modern, fast, mobile-ready digital products for businesses that want to look serious online. From a single landing page to a full custom business system — clean code, honest pricing, and everything owned by you.

What We Build

Four things, done well.

Websites & Landing Pages

Starting at ₹10,000

Clean, fast, mobile-ready websites for businesses that want a professional presence. Single landing pages, multi-page business sites, portfolios. Manage your own content with no code.

E-commerce Stores

Starting at ₹50,000

Sell your products online with a full catalogue, secure checkout, and an admin dashboard to manage orders. Built to grow with your business.

Booking & Appointment Systems

Starting at ₹40,000

Let customers book you directly — restaurants, salons, clinics, and services. Calendar, availability, confirmations, and an admin dashboard to manage it all.

Business Systems & Portals

Starting at ₹60,000

Custom CRMs, client portals, and internal tools built around how your business actually works. Manage leads, clients, and data in one place.

Why Stackwork

We do a few things most freelancers and agencies don't.

You see it before we build it

Every project starts with a free, clickable wireframe. You approve the structure before a single line of code is written.

We write your content for you

No waiting on copy. We write everything based on a simple brief, so your site launches complete.

You own everything

After final payment, the full source code, database, and every account is transferred to you. No lock-in.

Total transparency

We show you exactly which tools your project uses, what's free, and when anything might cost money as you grow.

A walkthrough on delivery

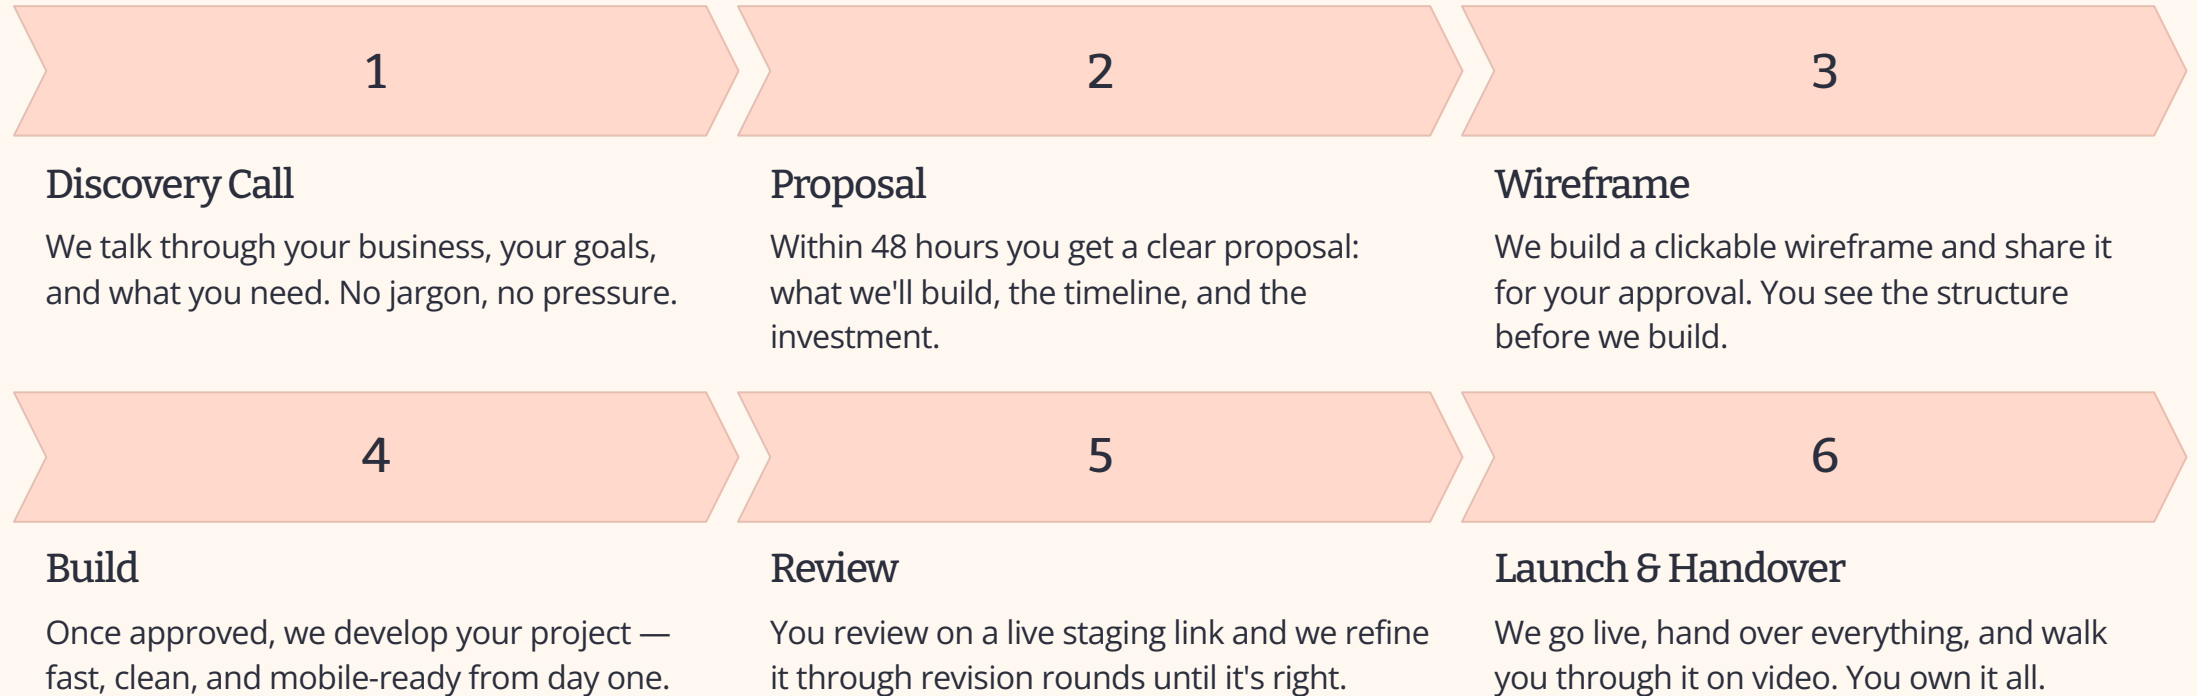

Every project comes with a personal video walkthrough so you understand exactly what you received.

30 days of free support

After launch, we fix any bugs free for 30 days. We stand behind what we build.

How It Works

A simple, clear process from first call to launch.

✔ Every project includes: mobile responsive design · content written for you · free wireframe · video walkthrough · 30 days free bug fixes · full source code and ownership · deployed live on your own domain.

Let's build something that works.

Whether you need a simple landing page or a full custom system, we'd love to hear what you're working on. Start with a free discovery call.
